Views FL-2-1 through FL-2-26 are photographs of the swing span portion of the of the Seven Mile Bridge over the Mosher Channel. They were taken by the Florida Department of Transportation in 1979, photographer unknown.

- FL-2-1. General elevation view, facing east.
- FL-2-2. General elevation view, facing west, closed position.
- FL-2-3. General elevation, closed position showing fenders.
- FL-2-4. General elevation, 3/4 open position, showing circular center bearing and super-structure.
- FL-2-5. General elevation, open position, showing circular center bearing, super-structure, operators shed.
- FL-2-6. Typical Fender
- FL-2-7. General view of south abutment connection, also showing fender construction.
- FL-2-8. Barrel shot, facing south.
- FL-2-9. General deck view, showing vertical, diagonal, sway and upper lateral bracing.
- FL-2-10. General deck view, showing steel grating deck, posts, diagonals, upper chords and lateral bracing.
- FL-2-11. General view of floor beams, stringers, and lower lateral bracing systems.
- FL-2-12. Detail of center compression posts, and vertical shaft drive train for operating jacks.
- FL-2-13. Turning shafts, worm gears for operation of lifting or lowering jacks.
- FL-2-14. General view, showing upper chords, lateral and sway bracing, facing north.
- FL-2-15. General upper view, showing upper chords, lateral and sway bracing, facing south.
- FL-2-16. Detail view of upper portal chord connection.
- FL-2-17. Detail view, upper chord connection, beginning of second panel.
- FL-2-18. Detail view, upper chord connection, beginning of third panel.

- L-2-19. Detail view, upper chord connection, end of third panel and the start of the central superstructure.
  - L-2-20. Detail view, upper lateral bracing.
  - L-2-21. Detail view, upper tension strap connection in central super-structure.
  - FL-2-22. Operating equipment: Hand wheel for control reversal, stick shift for jaw clutches, indicators for the turning of the bridge, and raising/lowering jacks, jaw clutches for bridge and jacks, jaw clutches for bridge and jacks.
  - FL-2-23. Brake, bridge turning shaft, shaft bearing.
  - FL-2-24. Operating equipment, turning shafts and worm gears for raising and lowering jacks.
  - FL-2-25. General interior view of operators shed facing east. Turning shaft for bridge, brake, bearing.
  - FL-2-26. General interior view of operators shed facing west, showing operating equipment.
- 

Views FL-2-27 through FL-2-43 are photocopies of photographs taken during construction (1909-1912), originals in the possession of The Henry Morrison Flagler Museum, Palm Beach, Florida. Photographer unknown.

- FL-2-27 Knight's Key Bridge looking toward Miami from point west of Knight's Key Dock (WRH-63, W-1).
- FL-2-28 Moser Channel Draw, N. abutment pier (WRH-214, W-5).
- FL-2-29 Moser Channel Bridge at joint W/concrete arches of Pacet Channel Viaduct, (WRH-277, W-9).
- FL-2-30 Knight's Key Bridge, erection of first steel span on to concrete pier, 21 August 1909 (W-12). See also H-25.
- FL-2-31 Knight's Key Bridge, lifting wood forms for piers on to concrete foundation (W-13).

- FL-2-32 Knight's Key Bridge, span No. 36 at crossing over Knight's Key Dock trestle (W-16).
- FL-2-33 Moser Channel Draw w/steel framing (WRH-215, W-20).
- FL-2-34 Moser Channel Draw, open w/construction barges and fender (W-21).
- FL-2-35 Moser Channel Draw, close-up, open (W-23).
- FL-2-36 Moser Channel Draw, close-up of steel bridging (W-25).
- FL-2-37 Moser Channel Draw, setting cofferdam for pivot pier (W-27).
- FL-2-38 Moser Channel Draw, pivot pier under construction w/steel reinforcing (W-31).
- FL-2-39 Moser Channel Draw, view down into wood form work for center pivot pier w/steel reinforcing (W-35).
- FL-2-40 Moser Channel Bridge, details of Pier # 174, drawing 12-23-1910, Rev. 2-21-11 (Dwg B-289).
- FL-2-41 Moser Channel Draw, details, Concrete Support for fender, 8-2-09 (Dwg B267).
- FL 2-42 Moser Channel Bridge, details of End Pier for Draw, undated, (Dwg 258).
- FL-2-43 Moser Channel Bridge, details of Center Pier for Draw, 7-3-09 (Dwg B-262).

Views FL-2-44 through FL-2-53 are photocopies of photographs taken during construction (1909-1912). Originals in the possession of the Florida Collection of the Monroe County Public Library, Key West, Florida. Photographer unknown.

- 2-44 Knight's Key Bridge, View of steel girders in place and on barge (#571).
- 2-45 Knight's Key Bridge, 3 horizontal views of construction. (#2492).
- L-2-46 Knight's Key Bridge, view of driving pilings in cofferdam (#1771).
- 2-47 Knight's Key Bridge, No. 8 Cofferdam for abutment (W3137).
- L-2-48 Knight's Key Bridge, finishing concrete piers w/view of temporary wood trestle in right (#2534).
- L-2-49 Knight's Key Bridge, upper pier forms in position and derrick barge No. 96 (#355 A).
- L-2-50 Knight's Key Bridge, view of cofferdam on barge (#4323).
- L-2-51 Knight's Key Bridge, view of first span, 1909 (#2518).
- L-2-52 Long Key Viaduct, view showing typical method of construction for all concrete arches in 7-Mile Bridge (#214).
- L-2-53 Knight's Key Bridge, view of derrick lowering cofferdam (Lindenberg Collection #1569).

Views FL-2-54 through FL-2-73 are photocopies of photographs (dates noted in the captions). Originals in the possession of The Historic Association of Southern Florida.

- FL-2-54 Moser Channel Bridge, View of upper steel framing of draw span, 12-22-26 (Matlack 131-40).
- FL-2-55 Moser Channel Bridge, view of tracks through draw span, 12-22-26 (Matlack 132-40).
- FL-2-56 Moser Channel Bridge, view of upper steel framing of draw span w/tracks receding in distance, 12-22-26 (Matlack 133-40).
- FL-2-57 Moser Channel Bridge, close-up of draw span partically open w/detail of operator shed, 12-22-26 (Matlack 134-40).
- FL-2-58 Knight's Key Bridge approaching Pigeon Key, 12-22-26 (Matlack 138-40).
- FL-2-59 Knight's Key Bridge, long side perspective, 12-22-26 (Matlack 141-40).
- FL-2-60 Typical concrete arch viaduct, 12-22-26 (Matlack 146-40).
- FL-2-61 Moser Channel Bridge, draw span, Oct 5-6, 1937 (Matlack 282-13).
- FL-2-62 Construction view of concrete bridge meeting railroad bridge, 10-28-37 (Matlack 247-13).
- FL-2-63 Pigeon Key Bridge, construction details of method for adapting bridge into highway. Oct. 5-6, 1937

(Matlack 287-131).

- L-2-64 Pigeon Key Bridge, view of riveters widening bridge for highway, Oct. 5-6, 1937 (Matlack 288-13).
- L-2-65 Copy of drawing of Part Section Through Roadway, Nov. 8. 1937 (Matlack 322-13-1).
- L-2-66 Pigeon Key Bridge, aerial view w/auto traffic, April 23, 1938 (Matlack 397-13-7).
- FL-2-67 Overseas Highway, wooden bridge between Key Largo and Mainland, April 9, 1929 (Matlack 127-50).
- FL-2-68 Moser Channel Bridge, draw span partially open, no date (Kyle K-32).
- FL-2-69 Construction view of concrete piers, for arches w/exposed reinforcing steel, no date (79-46-4).
- FL-2-70 View of concrete highway bridge w/railroad tracks as guard rails, ca 1937 (X-664-10).
- FL-2-71 Post card, "Side By Side, Railway and the Highway Span the Keys", no date (Perez donation).
- FL-2-72 Knight's Key Bridge, passenger train crossing bridge, no date (Bramson Collection, X-336-1).
- FL-2-73 Seven-Mile Bridge, view of tracks on concrete base, no date (Perez donation K-579).

Views FL-2-74 through FL-2-81 are copies of drawings from negatives furnished by the Florida Department of Transportation, Tallahassee Florida.
